

Cutting Automation

VSERIES**VECTOR**
the future of single ply cutting

Raytech's **V-SERIES VECTOR** Cutting Table ensures textiles are cut fast and accurately with edges sealed as needed.

- BLIND FABRICS
- SUNSCREENS
- MESH TEXTILES
- OUTDOOR SHADE TEXTILES
- CANVAS & ACRYLIC
- VINYL
- LEATHER
- COMPOSITES, RUBBER, CARDBOARD

The **VECTOR** features provisionally patented technology to pull out and hold down the textile. It cuts efficiently with the desired edge quality.

Faster, efficient, easier & cost-effective

The **VECTOR** eliminates the need for expensive 3 phase suction. It eliminates expensive plastic overlays.

By eliminating suction holes in the deck the **VECTOR** has no deck areas where edge quality is compromised.

The **VECTOR** features a revolutionary deck. Our tools love the new deck surface and so will your bottom line!

Servo drives ensure the table retains its accuracy. Frequent re-calibration is not needed. This contributes to the low maintenance, low cost of ownership paradigm for the new V-Series Vector Automated Cutting Table.

SPECIFICATIONS

STANDARD INCLUSIONS

- Integrated servo drive motors on all axes
- Automated trim cut
- Automated fabric pullout
- Fabric stabilization rollers
- Motorised fabric infeed
- Microsoft Windows® based operating system
- Automatic nesting & tool pathing
- Laser pointer
- Rotary knife
- Marking Pen
- Rigid steel construction
- Linear rail and rack and pinion drive (not toothed belts and rollers)
- Minimum of two (2) tools tangentially controlled

OPTIONS

- Ultrasonic knife
- Oscillating knife
- Barcode scanning
- Label printing at planning department and at machine
- Label and barcode output
- Inkjet marking
- Wireless connectivity to planning department
- Stock management
- Choice of decks to suit different tooling combinations
- Tooling options to suit tooling options cover most heavy industrial applications and substrates

CUTTING WIDTHS & LENGTHS

- Modular design and construction allows for wide range of table sizes
- **Cutting width standard** 3400mm (3500mm or wider is available)
- **Cutting length** 6 metres, 8 metres, 10 metres or 12 metres
